About This Software

Catzilla - Advanced version - tests and recommendations for gamers.

Features: custom tests, recommendations, archiving and comparing historical results. These options are not available in FREE and BASIC versions. Tests are focused to check all computer components simultaneously (not only GPU). After the test, you will receive a certificate indicating your computer's performance in games and recommendations how to improve its performance. Catzilla shows what should be replaced and where to buy it at low cost to upgrade PC.

Key Features:

- Recommendation system - recommendations for software and hardware.
The program finds fundamental issues and proposes solution e.g. installing latest drivers, setting the appropriate amount of cache, increase free disk space, change color depth, resolution, changing GPU or CPU for a better one etc.
- Checking games
The minimum requirements of the game are compared with your computer components during the test, and in this way you'll get an answer, whether the game will run on your computer smoothly and with all the details. Games will be also certified just like computer components and computers, making it much easier to determine how fast computer is required to run them.

catzilla 4k - advanced

This is hard!... but you can set it to easy :) It's still exhaustive though. They ain't shizzlin' about warming up, you're gonna need it. Ps. Also dang fun, and funny. Great piano music in the Saloon Social room, but remember, once you stop the music, you can't restart it. A great way to teach kids some music appreciation :). Great 4X Single player RTS.

Its like Earth 2150/Starwars Empire At War in space,
you can equip and upgrade your Space Station/Base with weapons,
your ships/units and harvesting buildings.
You collect resources , research point and have a lot of tech to unlock.

<https://www.youtube.com/watch?v=ac9vr8sG60g&index=1&list=PLWrIqGszZr5kOs-miRm2xWTUPLF2t6KT1>. Great little action game. You're a tank, blow stuff up, get cool weapons!. The Red Baron would cry tears of joy for this game. I got this game expecting it to be exactly as I expected it to be. It reminds me of a game called "Build-A-Lot", and it plays almost the same exact way. I dunno if its a rip-off of that game or not, I do not care really, as this game is fun to play when bored, and its the best investment of a game I have gotten. It was worth it, Buy this game if you like casual building.

Someone wrote on here in another posts rating it bad and comparing it to SimCity... this is nothing like SimCity as the population does not go any higher than 1500, and SimCity you could have a population of 500,000 plus bigger maps. This is a different game type than SimCity, and is more of a planning zones and placing the proper buildings in the proper places to make them happy.

I like playing the sandbox game and setting my own goals, its fun to reach those goals and feel accomplished everytime I finished them. The game has replayability, and I keep coming back to play when I have time and not playing another game, or if I need a break from other games. It gives me something to do to kill the time with.. While fun at first it gets repetitive pretty fast. Christ this game is a load of hot garbage. Struggle to control your character due to awkward controls and animations, bump into everything ever with random "Scary" noises that play for no reason. Jump straight up six feet in the air in a matter of seconds. Sometimes turn around for no reason! Honestly just avoid and save yourself some pennies.. It's pretty fun!

Repetitive, too short, three boring puzzles about pulling levers and opening valves like seriously who wants to do that, terrible AI, no variety and the story is not explained well at all, just a poor excuse to put zombies into the game. This should be free.. used to be really good but has been abandoned by developers and they are slowly shutting down servers (as far as i know there are a handful of community servers but that will end soon too) and the game will be impossible to play

RIP. nice simulation human :). Amazing graphics and gameplay. One of my favorite RPG horror games so far with new updates that make the game better. A must have for those new into the horror RPG genre.. Game was too short and played like max Payne. story went from hunting drug lords to fighting a nazi back to fighting drug lords. pretty much all over the place but the gun play was decent. Viaerium is truly a unique game...

There's no losing unless you give up~

No possible way to fail unless you stopped playing this game.

Those stuff aside, the game itself is quite luckluster, to say the least. It's graphics are minimalistic, yet pleasantly arranged artistically, making up for the very few assets it uses.

The game is very short, being able to be finished in under 30 minutes if you go along a normal pace transversing each level. Each level contains red orbs or the "orbs of wisdom" where picking one up causes inspiring quotes to flash on the screen. It is not mandatory to pick them all up to finish the game itself. As you complete each level, you approach closer to this so-called "Council", which are those gold cubes you bump into every time to complete a level.

To be honest, it would be unfair to judge the quality of this game based solely on my review. Some people like the well composed levels and short, inspiring story it delivers, others don't. I personally liked it, and I'd definitely say it's worth checking it out if you have a spare dollar or two to spend.
